Profile

My primary goal is to apply my technical expertise all throughout the full software life cycle to ensure production and delivery of products and services that meet client specifications. Along with a competent software developing team, and with strong personal knowledge, skills, and experience in software engineering, I am positive that this goal can be achieved. My experience as web developer combined with everything that i learned during my SW Engineering degree enhanced my abilities in designing, implementing, testing, and upgrading software. One of my objectives is to keep updated with the latest IT trends and technologies. I am confident that if given the opportunity, I can be a useful talent to the company.

Experience

Web Developer

Plus WebMarketing December 2014 – Present

- Working closely with other team members to plan, design and develop robust solutions in a timely manner.
- Modifying existing software to correct errors, upgrade interfaces and improve performance.
- Developing UI, management layer, Services and APIs.
- Taking technical ownership for key components and working through functional, performance and scale issues.
- Write and execute test cases to ensure all functionalities are working as intended.
- Consulting weekly with customers on project status, proposals and technical issues.

Tech Stack

React Javascript Node.js HTML CSS

Bootstrap Git .NET MySQL
